

CLERK SECURITY GROUP PERMISSIONS ADMINISTRATION

PERMISSIONS WITH OPTION SELECTED

OPTIONS	
ADMINISTRATION	Access to the Administration menu. Used to create/manage SwiftPOS records like Location Groups (Venues), Locations, Terminals, etc. It is also used to manage the Venue's Cloud Connectivity.
Location Groups (Venues)	Allows access to add/edit Locations Groups (Venues) in SwiftPOS which is only possible from the main server.
Delete Location Group	Allows access to delete a Location Group/Venue from SwiftPOS.
Regenerate Sales	Allows access to regenerate sales already in the database out to a file for re-processing.
Location Records	Allows access to add/edit Location Records/Outlets in SwiftPOS. NOTE : This only applies in those Location Groups for which authorisation has been granted.
Delete Location	Allows access to delete a Location Record/Outlet from SwiftPOS
Location Sub Filters	Allows access to edit what Sub-filters are assigned to Location Records.
Location Touch Settings	Allows access to manage what settings are sent to the Touch POS Terminals in their Locations/Outlets.
Location Warehouse Settings	Allows access to manage settings that impact the Suppliers > Warehouse Requisitions module.
Location Authorisation Limits	Allows access to manage settings that impact the Suppliers > Purchase Orders module.
	Allows access to define and manage a variety of system-level records including: - Price Levels - Medias (Tenders) - Reporting Medias which impact certain reports - Location Sub-Filters - Product Sub-Filters (used by the Suppliers > Purchase Orders > Product Creation Wizard) - EFT Card Media Links (used to map EFT transactions to certain medias by Card Number) - Custom Media Text (used if text needs to print on a receipt based on Medias used to finalise a sale) - EFT Acquirer Codes
Price Level & Media Set-up	<div> <div>Price Level & Media Set-up</div> <div>Media GST Exempt</div> </div> Allows access to determine what Media Types should be exempt from collecting GST when used to finalise part or all of a sale.
Terminal Records	Allows Terminals to be added/edited in SwiftPOS. NOTE : This only applies in those Location Groups for which authorisation has been granted.
Delete Terminals	Allows Terminals to be deleted from SwiftPOS (only possible if there's no sale data).
Tax Setup	Allows access to define and manage Tax Types and what Product Categories/Price Levels attract GST when sold through Terminals.
Time Periods	Allows access to define and manage Time Periods which can be applied to certain reports to break up revenue. E.G. 15min, 30min, Hourly, Meal Periods.
iMPRS Key Layouts	
AreaEdit	
Global Preferences	Allows access to manage settings which impact the overall behaviour of SwiftPOS. Things like enabling certain modes as well as defining SMTP settings used for automatic Batch Reports.

CLERK SECURITY GROUP PERMISSIONS ADMINISTRATION

Local Configuration	Allows access to manage settings which impact the behaviour of SwiftPOS for a Windows User/Machine combination. Things like SMTP details for Purchase Orders and behaviours of certain reports and forms within SwiftPOS Back Office.
Custom Media Reports	Legacy/Not Used
Batch Reports	Allows access to view/add/edit/delete Batch Reports which can automatically send/export from SwiftPOS.
